

FIRE IN THE HOLE xBOMB

Grab your sharpest pickaxe and your most explosive dynamite as Nolimit City takes you deep down underground to where the sun doesn't shine - but the gold does.

With a 6x3 reel area that expands up to 6x6, exploding wilds and 64 ways to win that can expand up to 46,656 - you'll blast your way through the mines in search of the lucrative gold.

Fire In The Hole xBomb is the first Nolimit City title with the xBomb feature, which removes all adjacent symbols and increases the win multiplier with one - no matter if it's a winning round or not.

Game Features

Collapsing Mine

Each spin begins with 3 active rows and for each collapse, an additional row becomes active, up to 6 rows. A new collapse can be triggered by a winning combination, xBomb Wild explosion or a Wild Mining feature.

Winning symbols are paid out and removed before triggering the next collapse, which will, in turn, make all symbols fall downwards, leaving the empty position for new symbols to drop down to.

Lucky Wagon Spins

3, 4 or 5 bonus symbols will trigger the Lucky Wagons Spins feature with 2, 3 or 4 rows of the reel area open initially. The feature starts with 3 spins and will reset to 3 spins every time a coin lands in the reel area. All coin values are valued times (x) the active bet.

During the Lucky Wagon Spins feature, the top row will reveal enhancers for each spin - Coin values, Multipliers, Dynamites, Bag, Chest or the Dwarf. An enhancer is activated when a coin lands on the reel below the enhancer.

xBomb Wild Multiplier

An xBomb Wild symbol substitutes any symbol except for the Bonus symbols. An exploding xBomb Wild removes adjacent symbols except for Bonus symbols and will increase the win multiplier by one for the next collapse.

All xBomb Wilds will explode before the next collapse, except when the Wild Mining feature is triggered. An xBomb Wild will explode when there is a win, no matter if it's a part of the winning combination or not. It will explode and trigger a new collapse if there isn't a win, and wild Mining feature is not triggered.

Wild Mining

Wild Mining will be triggered in the main game when 3, 4 or 5 of the same type of symbol align horizontally and there is no winning combination. 3, 4 and 5 symbols, awards 1, 2 or 3 wilds respectively. All other positions above the bar will explode as long as it's not a Bonus or a Wild symbol, and it will trigger a new collapse.

Nolimit Bonus - Feature Buy Functionality

Buy your way straight into the lucrative Lucky Wagon Spins feature, with the option to trigger 3, 4 or 5 bonus symbols for 60x, 157x or 500x the bet
